Index To Insulation/Circuits 1980 Editorial Articles

Coil and Motor Manufacturing Tips	Page	Issue
Development of Winding Insulation Allows Smaller, Cooler Running Transformers	21	Jan.
Chemical Stripping of Coils, Part One: The Process	25	Feb.
Chemical Stripping of Coils, Part Two: The Results	25	March
Wavesoldering of Motor Armatures Increases Productivity and Quality	35	April
Saw Manufacturer Cuts Through Insulation Problem With New Laminate	19	May
Temperature Rise Versus Efficiency in Dry-Type Transformers	66	June
New Technique for Rapid Testing of Pulse Transformers	32	July
New Water Based, Solvent Based, and Solventless Varnishes	46	Aug.
How to Select Thermosetting Electrical Insulating Resins	45	Sept.
Special Considerations for Soldering Bobbin Assemblies	43	Oct.
Coil Defects and Testing Considerations	35	Nov.
The Growing Importance of Armature Testing	90	Dec.

Connection and Termination Corner	Page	Issue
Wear of Gold Contact Finishes: The Importance of Topography, Underplate, and Lubricants	15	Jan.
Unconventional Interconnections Meet PCB Demands	103	Feb.
Defects in Gold Plated Electrical Contacts: Examples, Causes, and Cures	37	March
Laser Wire Stripping: Equipment and Operation Notes	47	April
RF Plasma Cleaning of Ceramic Insulators	92	May
Methods and Equipment for Wire Stripping and Crimp Terminations	27	June
Flexible Jumpers Meet Diverse Interconnection Demands	41	June
Terminal Blocks: Important But Often Neglected Components	35	July
Replacing Broken Conductors in Flat Cables	31	Aug.
A Simple, Cost Efficient Contact Insertion Method	55	Sept.
Connection and Termination Fundamentals Supplement	57	Oct.
Determining the Cost Effectiveness of IC Pluggable, Wire Wrappable Circuit Boards	23	Nov.
Plated Through-Hole Closure for Designers of Press-Fit Backplanes	85	Dec.

Microelectronic Methods	Page	Issue
All-Ion Implantation Process for Production of Integrated Circuits	39	Jan.
Microelectronics Glossary	30	Feb.
Static Protection, Part 1: Causes of Static Charge Development and Effects on Electronic Devices	20	March
Static Protection, Part 2: Practical Means of Static Elimination	38	April
Performance of Thick Film Materials on 96% Alumina Substrates, Part One	96	May
New Method for Attaching Leads to Thin Films	48	June
Performance of Thick Film Materials on 96% Alumina Substrates, Part Two	23	July
The Effect of Integrated Circuits on Usage Trends for Printed Circuit Boards	37	Aug.
Stitch-Bond Parallel-Gap Welding for Integrated Circuits	63	Sept.
Precision Process Control for VMOS FET Channel Regions	86	Sept.
Modified Ion Bombardment Technique for Multilayer Metallization of MOS IC's	41	Oct.
Automated Placement Technique for LSI Circuits	45	Nov.
Improved Design for Chemical Vapor Deposition Reactor	62	Nov.
Testing Protective Coatings for Hybrid Microcircuits	88	Dec.

Printed Circuit Techniques	Page	Issue
Recommendations for Screen Printing Fine Line Images in Circuitry	33	Jan.
Measuring Plating Thickness on Printed Circuit Boards	41	Feb.
The Printed Circuit Fundamentals Handbook	47	Feb.
Reduce Punched Board Tooling Costs with N_2 Strippers	30	March
Cleaning Copper Chemically — A Comparison	41	March
Planning for Printed Circuit Waste Treatment	43	April
A New Technique Facilitates Flexible PCB Processing for Telephones	16	May

Improving the Durability of Production Artwork	85	May
Managing Wastewater Treatment, Part 1	78	June
Managing Wastewater Treatment, Part 2	28	July
In-House Wired Board Process Lends Speed, Flexibility	25	Aug.
PCB Component Insertion System For Speed and Accuracy	67	Sept.
Developments in Electrical Grade Laminates	79	Sept.
Printed Circuits in Red China	23	Oct.
When to Consider Molded Printed Circuit Boards	27	Oct.
Consider All System Requirements When Selecting Laminate Materials	54	Oct.
Update on Printed Circuit Materials, Processes, and Equipment	17	Nov.
Repairing Traces on Printed Circuit Boards	27	Nov.
High-Volume Production of Reliable Through-Hole Boards	46	Nov.
The Soviet Market for Western Electronics	51	Nov.
How to Set Up a Cost-Effective, Compact In-House Materials and Processes Laboratory	31	Dec.
Understanding the Electronics Industry in Japan	35	Dec.

Production Soldering Clinic

	Page	Issue
A New Flux For Electronics Soldering	27	Jan.
Wave Soldering Machines: A Brief Guide to Maintenance and Repair	52	Jan.
PWB Cleaning Technology: Challenges for the Eighties	16	Feb.
Tinning of Integrated Circuit Leads	28	March
How to Make Soldered Connections to Terminals	69	March
Improving Quality and Increasing Quantity of Wavesoldered Printed Wiring Assemblies Through Proper Maintenance	21	April
Aqueous Cleaning: A Systems Approach	31	May
The Insulation and Metal Materials Fundamentals Handbook	37	May
How to Make Soldered Connections to Terminals	33	June
Energies of Activation and Rates of Solder Wetting With Activated Fluxes	12	July
Solderability Assurance and Corrosion Protection of PWB's and Components, Part 1	20	Aug.
Solderability Assurance and Corrosion Protection of PWB's and Components, Part 2	49	Sept.
Solderability Assurance and Corrosion Protection of PWB's and Components, Part 3	31	Oct.
New Concept Involving Solder Flowing Through Precisely Placed Holes in Plastic Film Useful for High Density Connections	51	Oct.
Equipment Parameters for Aqueous Flux Removal After IR Reflow	55	Nov.
The Wicking Method of Solder Removal	25	Dec.

Testing Spotlight

	Page	Issue
Testing for Delamination Resistance of Multilayers	61	July
Measuring Resin Contents of PC Laminates with Thermal Gravimetric Analysis	29	Aug.
High Reliability Multilayer Board Inspection	39	Sept.
Achieving Flame Resistance in Plastics: Methods, Materials, Tests, and Ratings	28	Oct.
Testing PCB's With Vacuum-Actuated Bed-of-Nails Test Heads	13	Nov.
Hipot Tester Speeds Factory Dielectric Withstand Testing	93	Dec.

Applications, Uses, Designs

	Page	Issue
Rigid and Flexible Membrane Switches	25	Jan.
Trimmer Capacitor Utilizes Precision Glass Tubing	30	Jan.
Stacking Connectors for PCB's	8	Feb.
Terminal Strip Makes Spider Switch	23	Feb.
CAD System Gives Circuit Designer Help	23	Feb.
LED Mount for PCB Offers Visibility	6	March
Capacitor Equipment Cuts Energy Costs	46	March
Mineral-Reinforced Resin Solves Auto Adapter Ring Warp Problem	46	March
PCB Bus Bars Help Replace 5 PCB's with 1	46	March
Switching System Boards Use Less Gold	49	March
Carbon Fiber Reinforcement in Sheet Molding for Automotive Applications	12	April
Silicone Coating Protects Laser-Trimmed Smoke Detector Circuits	17	April
New Approach to Thick Film Resistor Design	6	May
OEM, R&D Small Cases Are Flexible	8	May
Silicone Adhesive Bonds Ferrite Cores of Memory Array	111	June
Bellows Contacts Work in Press-Fit Panels	8	Aug.
PCB's Lead Fiber Glass Textile Use	8	Sept.
Polymer Processing Additive Aids in Molding of Electrical Cable Couplers	16	Oct.
New Applications for Plastics	48	Oct.
Solder Termination Sleeves, Tough Wire Cut Avionics Wiring Costs	66	Nov.
Metallic Glass Ribbons in Transformer	66	Nov.
PCB Carrier Employs Reinforced Plastic	67	Nov.
Automatic Paste Soldering Joins Terminals to Zinc Carbon Batteries	67	Nov.
PCB Assembly System Uses Backlight	9	Dec.
Seismic Buoy Transmitter Is Assembled and Sealed with Structural Adhesive	24	Dec.

Materials, Systems, Properties

	Page	Issue
Use of Steel Contacts Is Challenged	10	Jan.
An Update on Electrical/Electronic Insulation	12	Jan.
Flexible Flat Cable	8	Feb.
Engineering Epoxide Is Processable	6	March
Electrically Insulative Glass Film Produced on Silicon Steel	16	March
Rubbery Coating Encapsulates Hybrid Circuits	48	March
Flat Cable Connectors Are Compact and Low Cost	94	April
PVC Insulated Female Disconnect	94	April
Micro Miniature Tubing Is Strong But Tiny	8	May
Miniature Terminal Block System Allows High Density	12	June
Special Report on Gold	44	June
Cost Saving Resin for Wall Receptacle	111	June
Anticapillary Wire Stops Moisture Wicking	9	July
Crepe Tubing Insulates Transformer Lead Wire	8	Aug.
High Reliability Multilayer Laminate	8	Aug.
New Engineering Polymer for Electrical Connectors	10	Sept.
Characterization of a Cylindrical Capacitor With High Dielectric Strength	75	Sept.
Pre-Made Insulated Thermocouples	7	Oct.
Miniature Clad Contact Tapes Can Reduce Costs	7	Oct.
Update on Electromagnetic Shields and Plastics	46	Oct.

Flame Retardant Polypropylene Exceeds Requirements	8	Nov.
Digital Temp Controllers Offer Automatic Scanning	8	Nov.
Improved Grade of Copper Circuitry Laminate	8	Nov.
High Performance Fiber Optic Kit	8	Nov.
Magnet Wire Wrapping Material Is Economical	8	Nov.
Thermal Cut-Off Thin Wall Cases Have Dimensional Stability	67	Nov.
Cooling Fan Cords Are Ready To Install	9	Dec.

Processing and Production Techniques

	Page	Issue
Heat Gun Suits Delicate PCB Work	25	Jan.
Circuit Verifier Cuts Costs	25	Jan.
Screenless Image Transfer System	25	Jan.
Power Suppy Tester Adapts to Demands	8	Feb.
Test Fixtures Offer Low Cost Versatility	8	Feb.
Electronic Water Treater Tackles Scale Build-Up in Laminating Press	23	Feb.
Stitch-Wire Machine Offers High Volume	6	March
Solderability Tester is Microprocessor Controlled	6	March
Lead Trimming Template for Uniform Lead Lengths	15	April
Minicomputer Speeds Transformer Testing	18	April
PCB Assembly System Has Self-Programming Unit	94	April
Laminate Cuts PCB Processing Costs	94	April
Wafering Machine Minimizes Kerf Loss	8	May
Machine Inspects 100 PCB Holes Per Minute	8	May
New Equipment for Increased Productivity	23	May
Rework Center Repairs Damaged PCB's	12	June
Temperature Measurement Modules for Computers	12	June
Negative Photoresist Offers High Speed, High Resolution	9	July
Carousel Moves, Stores, and Tests Units	9	July
Specialized Tool Handles Desoldering	9	July
Machine Combines Assembly and Soldering	8	Aug.
Semi-Automation Techniques Improve Wire Harness Board Assembly	33	Aug.
High Volume Production Wavesoldering System	10	Sept.
Tape Holds Components for Insertion	10	Sept.
Ultrasonic Aqueous Stripper Cuts Costs	10	Sept.
Integrated DIP Print/Cure System	7	Oct.
Passive Trim System Is Fully Automated	7	Oct.
Plasma Desmear System for Multilayer PC Boards	9	Dec.
MBE System Grows Uniform Semiconductors	9	Dec.
